Professional Summary

Backend Engineer with 7+ years of experience designing and optimizing scalable, high-performance systems. Expert in Node.js, TypeScript, and API architecture, passionate about building secure, resilient backend solutions while mentoring teams and improving engineering practices.

Experience

- | | |
|--|---------------------|
| Backend/Blockchain Engineer , Chainconsults – Lagos | Apr 2021 – Jan 2024 |
| • Engineered RESTful APIs serving high-traffic React front-end applications with sub-100ms latency. | |
| • Designed scalable backend services supporting 100k+ concurrent users with zero downtime. | |
| • Built blockchain logic enabling streamlined decentralized trading experiences. | |
| • Optimized database queries, indexing, and caching, improving performance by 40%. | |
| • Implemented secure authentication flows (OAuth2, JWT) and reliable CI/CD pipelines with Docker & GitHub Actions. | |
| Lead Developer , Boundlesspay – Lagos | Jul 2017 – Dec 2020 |
| • Architected and maintained APIs powering platforms with 50,000+ concurrent users. | |
| • Oversaw full SDLC: requirements gathering, development, deployment, and maintenance. | |
| • Improved system scalability and reliability, ensuring stable performance under peak loads. | |
| • Mentored junior developers and enforced coding best practices. | |
| Web Developer , Codemwing – Port Harcourt | Apr 2016 – Sep 2016 |
| • Migrated a multi-page web app into a high-performing React-based single-page application. | |
| • Developed backend RESTful APIs with PHP & MySQL, improving efficiency and functionality. | |
| • Collaborated with product managers to deliver user-focused features on time. | |

Education

Rivers State University, BSc in Applied Mathematics
Jan 2014 – Jan 2018

Skills

Languages & Frameworks: Node.js, TypeScript, JavaScript (ES6+), Express.js, GraphQL

Databases: PostgreSQL, MySQL, Redis, MongoDB

DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3), GitHub Actions, CI/CD

Architectures: Microservices, Event-driven systems, REST APIs, WebSockets

Messaging & Caching: Kafka, RabbitMQ, Redis

Security & Testing: OAuth2, JWT, API Security, Jest, Mocha

Projects

Rentease (2023): Created backend for real-estate website for flexible payments and scalable property search.
